Servizi per la Sanità e l'Assistenza Sociale

Students attending this curriculum acquire the skills needed to organize and implement educational actions aimed at promoting the health and bio-psycho-social well-being of individuals and communities.

After a 5-year course, the students will be able to:

- care for others by meeting their health and psycho-physical needs;
- adopt appropriate methodologies and tools, committing to detect the users' needs;
- properly mediate the relationship between users and operators, ensuring the effectiveness of the action and preparing customized action plans, where appropriate;
- manage information, advice and guidance activities to facilitate access to and use of territorial services;
- use pedagogical methodologies to identify, implement and monitor the most suitable educational actions;
- organize and carry out activities to promote the well-being and autonomy of the person with distress;
- share expertise within the team;
- provide input for the promotion of lifestyles that respect hygiene, food and safety standards.

Main subjects:

HUMAN SCIENCES - PSYCHOLOGY - HYGIENE - OPERATIONAL METHODOLOGIES - ADMINISTRATIVE TECHNOLOGY

Professional Profile

After a 5-year-course, our students obtain a Professional Education Diploma and can choose any of the following options:

- 1 Health and Social Care Worker (OSS) qualification: a qualification required for employment in Healthcare Residences, hospitals and other public and private social and healthcare facilities (the OSS qualification is acquired by attending a course accredited with the Region);
- 2 Career prospects: employment opportunities in firms and private social cooperatives running recreational and educational centers;
- 3 University studies: access to any university and post-diploma courses of Higher Education and Training.
Most common choices include paramedical faculties, Education and Training Sciences, Sociology, Psychology; three-year degree courses of Professional Educator and Social Worker.

Technical Institute Technical Economic Tourism

Students who attend technical courses obtain a diploma and have a scientific and technological preparation which allows them to perform highly qualified work in their own field of specialisation. Main subjects studied are tourism and business, law and tourism legislation, art and tourism geography.

After a 5-year-course our students will be able to work for and manage tourism businesses and create products and services for tourism industry.

They can enroll at:

- University
- Short specialisation courses of 800/1000 hours
- Two year courses to obtain a higher technical diploma

Professional Education Commercial Services (Commercial/Tourism)

Professional education follows a technical-operational and practical programme, to learn a job or profession.

Main subjects studied are: law and economics, commercial services techniques, to work in the business administration and accounting field.

After a 5-year-course our students obtain a Professional Education Diploma with Commercial or Tourism focus area.

This diploma gives greater possibilities of qualified work, and also gives access to university or to the Higher Technical Education (ITS).

Occupational Training Advertising and Accommodation Services

If you prefer to attend school for a shorter period of time, you can learn a job, choosing this occupational training course authorised by the Lombardy Region.

This course lasts 3, 4 or 5 years before obtaining different level certification.

3 year course to get a qualification at II European level of:

- Advertising and Accommodation Services Operator

4 year course to get a diploma at III European Level of:

- Advertising and Accommodation Services Technician

This diploma gives access to the Higher technical education and training (IFTTS) or to the 5 year of the Professional Education to get a diploma to access university or Higher Technical Education (ITS).
